

AVERUS
FIRE SERVICES

More Than Just Hood Cleaning

One Provider for Your
Fire Protection Needs!

Stay Fire Safe with Averus

Sure, we clean the hood, (we even apply complementary shine treatment) but it's the accumulated buildup in the duct- work leading to the fan and roof — areas rarely viewed and with limited (if any) fire protection where your risk is greatest. Many vendors simply skip maintenance in these areas to save themselves time and money, because they know it's unlikely anyone will crawl inside the ceiling or flip over a fan on the roof to check their work. In the event of a fire or a system discharge we are available **24/7/365** to get you back in business as soon as possible!

Customer Driven Solutions

Since 1988 we've been working to forecast customer needs and provide solutions. We developed proprietary technology to assist managers and operations/facility teams at all levels of business. Some of what we offer includes:

Reporting - Recap of service, Budget Forecasts by Store, Deficiencies by Store

Invoice Options - Web Billing, e-Billing, e-mail, Consolidated/attached, and Budget

Our Secure Key and Code Program - Started in 1994 (insured and bonded)

Commitment to True Performance

In 2004, we pioneered the picture programs that many competitors have tried to duplicate. To have eyes on every completed job in the least visible and most critical areas. Technicians take digital images of your exhaust, that are reviewed by their direct supervisor and our internal deficiency manager. We print them on the back of invoices at no-charge to our customers because your piece of mind is important and confidence is invaluable. Of course, that's not the only way we ensure you're getting the most comprehensive cleaning. For every 3 crews there is a direct manager or supervisor to oversee them! Every AVERUS team member begins with training, hands-on and in a classroom: from our technicians and managers, to our customer service and sales reps. And it doesn't end there, after initial training our comprehensive monthly training program continues to address new products, best practices and industry changes.

**BEFORE
CLEANING**

**AFTER
CLEANING**

Actions Speak Louder Than Words

The Averus recipe for success combines three key ingredients: state of the art cleaning equipment, chemicals and proven techniques. This ensures that your entire system is thoroughly cleaned top to bottom:

- ☒ Exhaust Hood Plenum
- ☒ Accessible Horizontal and Vertical Ductwork
- ☒ Grease Exhaust Fans

Count on the Red Carpet Treatment

- ☒ Professional, courteous and efficient
- ☒ Flexible scheduling process to meet your specific needs
- ☒ Predetermined service appointments available
- ☒ Averus teams are available 24/7 for emergency response

Averus Provides the Most Comprehensive On-Site Evaluation

- ☒ A comprehensive quote for kitchen exhaust and fire prevention
- ☒ Detailed system review, including picture documentation
- ☒ Exhaust system cleaning cycle recommendation based on NFPA guidelines
- ☒ Identification of situations that may require corrective action
- ☒ A detailed service program customized to fit your specific needs

Upon completion, our goal is to leave the area where we were servicing your system in the same condition we found it and better. We will apply a complementary Shine Treatment to stainless steel hood exteriors that are free of any documents or other items. We leave your filters out of the hood in order to highlight the service area and so your team can review the cleanliness of the plenum and ductwork.
